Digital Test Kit

Lovibond Scuba II Digital Test Kit

Specifications

- Every pool owner should check the most important parameters in his pool at regular intervals. This is the only way to ensure that water quality is maintained at the right level and to arrange dosing in an optimum manner.
- The Scuba II enables the operator to check the pool water quickly and accurately. The integrated sample chamber is filled by immersing it in the water.
- A tablet reagent is added and generates a characteristic colour which can be measured using the photometric principle. The result is then displayed on the screen. Five parameters: free chlorine, total chlorine, pH, alkalinity and stabilizer (cyanuric acid) are measured within a few minutes.

Code	Description	Optics	Power	Display	Dimensions (mm)	Weight (kg)
00505078	Scuba II Test Kit	Temperature-compensated LED ($\lambda = 530 \text{ nm}$) and photo-sensor	2 batteries (AAA), capacity ca. 100 tests	LCD	145 x 70 x 45	0.165

CS608
